

The Power Electric Advantage

- Financially Stable and Innovative Company
- Leading Supplier of Custom Electric Motors
- Dynamic and Collaborative Work Environment
- Industry-leading Clients across Diverse Markets
- Competitive Pay and Strong Benefits

History

Power Electric, established in 1986, is dedicated to helping Original Equipment Manufacturers grow by delivering expert solutions, guidance, and support for their most challenging motor and gear motor needs. Over 30 years later, we have evolved into a global leader in engineered electric motor solutions, recognized for our commitment to high-quality products and exceptional customer service.

Our success is built on a steadfast commitment to exceeding customer expectations.

Global Presence

Our carefully vetted global network features unparalleled access to world-class motor manufacturing facilities resulting in flexible, competitively priced, and exceptionally high-quality products for our clients.

Custom Engineered

Join a dynamic team that thrives on understanding and solving our client's most critical motor and machine performance limitations! From developing unique technical solutions to creating client-specific inventory management solutions, we partner with our clients from design to delivery and beyond!

Vision and Mission Statement

Power Electric is committed to providing the best value through high-quality products and services that competitively meet or exceed customer expectations.

This value is achieved with people as the source of our strength.
